Snipers + Marksman

The complete Search & Destroy gunsmith field guide

21 live weapons · exact recommended builds · best role · secondary · perks · honest tradeoffs · Global MP Season 6

THE FAST ANSWER

LW3-Tundra is the best all-round sniper. **DL Q33** is the safest conventional choice. **3-Line Rifle** has the highest current ceiling. **Type 63** is the marksman ceiling; **SKS** is the steadier two-tap.

VERSION LOCK

Global Multiplayer · Ranked Search & Destroy · 100 HP · live 2026 Season 6 “Take Your Heart” · checked July 29, 2026 Pacific. Announced Season 7 changes are excluded.

Built for phone reading and Windows viewing. No skin-specific paid advantage is required. Import codes are omitted unless independently verified live.

How to use this guide

1 · PICK A JOB

Opening pick: LW3 / DL Q33 / 3-Line. Quickscope entry: Locus / Koshka / Outlaw. Heavy lane: HDR / ZRG. Two-tap anchor: Type 63 / SKS / SO-14.

2 · USE THE EXACT FIVE

Each weapon page gives one five-attachment build sourced from a current-dated guide and checked against the live Season 6 weapon gate.

3 · PAIR THE RIGHT SAFETY TOOL

L-CAR 9 is the default after a miss. Melee is shown only where movement is worth giving up the gun swap. If you are learning or solo-queuing, L-CAR is safer.

4 · DO NOT CONFUSE UI BARS WITH PHYSICAL STATS

A value such as “Fire Rate 28” is a comparative UI bar, not 28 RPM. This guide only prints physical milliseconds, RPM, meters or damage when a usable numeric source supports the unit.

Shared S&D; kit

L-CAR 9 · MISS-RECOVERY BUILD

YKM Integral Suppressor · Agile Stock · Field Agent Foregrip · Fast Extended Mag A · Rustle Grip Tape

Use on slow anchors, semi-auto rifles, five-round marksman builds, or whenever a hitmarker is likely.

DEFAULT PERKS

Skulker · Ghost · Dead Silence

Quiet micro-movement, UAV concealment, and silent walking. Swap Ghost to Toughness only when you deliberately hold an exposed lane and flinch is losing the second shot.

AGGRESSIVE PERKS

Lightweight · Ghost · Dead Silence

For Locus, Koshka, Outlaw and mobile marksman routes. Movement does not excuse giving away footsteps.

ANCHOR EQUIPMENT

Trophy System + Frag for a planted hold or predictable lane. **Smoke + Frag** for crossing and retaking. Utility choice must follow the route, not the weapon's tier.

Role ranking — not a universal tier list

All-round	LW3-Tundra	DL Q33
Ceiling	3-Line Rifle	LW3-Tundra
Quickscope	Locus	Koshka
Heavy lane	HDR	ZRG 20mm
Two-tap	Type 63	SKS
Flexible MR	SO-14	MK2
Specialist	NA-45	Rytec AMR

A tier means strong for its stated job, not automatically best for every map. Specialist means the weapon requires a rehearsed purpose.

S 3-Line Rifle

Sniper · Highest ceiling

BEST S&D; USE

Flexible opening-pick rifle. Pre-aim the first lane, then rotate behind your entry.

THE FIVE

Maxim Silencer · **EMPRESS 700MM TNO2** · **ZAC CUSTOM MZ** · **SMLE Pistol Grip** · **.30-06 20 Round Mags**

WHY IT WORKS

The magazine package adds damage, range, velocity and 20-round capacity; the stock and grip recover handling.

SECONDARY L-CAR 9

PERKS Skulker · Ghost · Dead Silence

BIGGEST TRADEOFF The balanced build is not the absolute fastest ADS setup. Do not challenge close corners unscoped.

DECISIVE NUMBER / CHECK

A current community import test reports a 278 ms maximum-ADS build and one-shot coverage everywhere except legs; treat that as provisional until reproduced in-game.

AGGRESSIVE DIRECTION Remove the silencer only when a faster handling part is confirmed on your own Gunsmith screen.

CONSISTENCY DIRECTION Keep the 20-round magazine and pre-aim; it is the build's strongest round-to-round advantage.

Confidence: Moderate · build source checked 2026-07-29

S

LW3-Tundra

Sniper · Best all-round sniper

BEST S&D; USE

Use for both aggressive picks and passive overwatch without changing weapons.

THE FIVE

Tactical Suppressor · 28.2" Tiger Team · Bandit Steady Stock · 7 Rnd · Airborne Elastic Wrap

WHY IT WORKS

The sourced current profile confirms one-shot potential above the waist at any range, while the wrap improves ADS and flinch resistance.

SECONDARY Melee

PERKS Lightweight · Ghost · Dead Silence

BIGGEST TRADEOFF The Tiger Team barrel increases the fire interval; a miss is still expensive.

DECISIVE NUMBER / CHECK

Current source lists 91 base damage and a 1.7× chest multiplier; its UI fire-rate number is not RPM.

AGGRESSIVE DIRECTION Melee is best when your first-shot accuracy is strong and you need rotation speed.

CONSISTENCY DIRECTION Use the L-CAR 9 instead of melee when solo-queuing or learning the rifle.

Confidence: Moderate-high · build source checked 2026-07-29

S

DL Q33

Sniper · Consistency-first

BEST S&D; USE

The safest conventional sniper for repeatable opening picks and mixed ranges.

THE FIVE

MIP Light · **YKM Combat Stock** · **OWC Laser - Tactical** · **Sleight of Hand** · **Extended Mag A**

WHY IT WORKS

Broad torso/arm one-shot coverage and a straightforward handling build make it forgiving by sniper standards.

SECONDARY L-CAR 9

PERKS Skulker · Ghost · Dead Silence

BIGGEST TRADEOFF The tactical laser is visible while holding an angle; hide the beam on nearby cover.

DECISIVE NUMBER / CHECK

A current numeric cross-check gives roughly 53.6 RPM, or about 1.12 s between shots.

AGGRESSIVE DIRECTION Melee is viable for confident rush snipers; the L-CAR remains the safer default.

CONSISTENCY DIRECTION Extended Mag A plus Sleight of Hand minimizes the chance that a long round catches you empty.

Confidence: Moderate · build source checked 2026-07-29

S Locus

Sniper · Reliable quickscope

BEST S&D; USE

Take mobile mid-lane picks where DL Q33 handling feels too slow.

THE FIVE

YKM Lightweight Short · **OWC Skeleton Stock** · **OWC Laser - Tactical** · **OWC Stopping Power Reload** · **Stippled Grip Tape**

WHY IT WORKS

Stopping Power expands the reliable one-shot result while every other slot pushes handling.

SECONDARY Melee

PERKS Lightweight · Ghost · Dead Silence

BIGGEST TRADEOFF A miss produces a long recovery window and the laser can reveal a held corner.

DECISIVE NUMBER / CHECK

A current numeric cross-check gives about 54 RPM; Stopping Power produces roughly a 1.17 s follow-up interval.

AGGRESSIVE DIRECTION This exact build already spends four slots on speed; use melee to maximize rotations.

CONSISTENCY DIRECTION Swap melee to the L-CAR 9 if missed-shot recovery is costing rounds.

Confidence: Moderate · build source checked 2026-07-29

A Koshka

Sniper · Aggressive quickscope

BEST S&D; USE

Best when you take short-to-mid off-angles and relocate after every shot.

THE FIVE

MIP Light Barrel (Short) · **Mobility Stock** · **OWC Laser - Tactical** · **8 Round Fast Extended Mag** · **Stippled Grip Tape**

WHY IT WORKS

The complete sourced build emphasizes ADS, movement and reload capacity for repeated fast peeks.

SECONDARY Melee

PERKS Lightweight · Ghost · Dead Silence

BIGGEST TRADEOFF Mobility parts increase flinch/recoil penalties; do not hard-scope while exposed.

DECISIVE NUMBER / CHECK

The current guide reports a broad 180/160/140/90 body-zone damage pattern.

AGGRESSIVE DIRECTION Melee is the natural pair for slide-peek and reposition play.

CONSISTENCY DIRECTION Use L-CAR 9 if you frequently tag or miss at close range.

Confidence: Moderate · build source checked 2026-07-29

A Outlaw

Sniper · Fastest-feeling specialist

BEST S&D; USE

Attack short and medium sightlines; aim high chest and avoid leg-line shots.

THE FIVE

MIP Memorial Cowboy · **YKM Combat Stock** · **FMJ** · **OWC Laser - Tactical** · **Stippled Grip Tape**

WHY IT WORKS

The barrel, stock, laser and tape stack handling, while FMJ protects penetration value.

SECONDARY Melee

PERKS Lightweight · Ghost · Dead Silence

BIGGEST TRADEOFF Its one-shot zone is less forgiving than the heavier rifles.

AGGRESSIVE DIRECTION Use the movement secondary only if your crosshair placement stays above the waist.

CONSISTENCY DIRECTION The L-CAR 9 is a better pair on tight maps with frequent hitmarkers.

Confidence: Moderate · build source checked 2026-07-29

A HDR
Sniper · Long-lane anchor

BEST S&D; USE
Hold the longest route or bomb cross and make the enemy spend utility to dislodge you.

THE FIVE
Monolithic Suppressor · **26.9" HDR Pro** · **FTAC Stalker-Scout** · **OWC Laser - Tactical** · **Sleight of Hand**

WHY IT WORKS
The suppressor and long barrel preserve lane control; stock, laser and reload perk keep it usable.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF Slow weapon movement and ADS make rushed retakes difficult.

AGGRESSIVE DIRECTION Do not force an aggressive conversion; choose LW3, Locus or Koshka instead.

CONSISTENCY DIRECTION Use Ghost instead of Toughness when UAV concealment matters more than flinch.

Confidence: Moderate-high · build source checked 2026-07-29

A ZRG 20mm

Sniper · Penetration / heavy pick

BEST S&D; USE

Challenge deep cover lines where upper-torso penetration matters more than speed.

THE FIVE

OWC Light Suppressor · **MIP Light Barrel (Short)** · **YKM Light Stock** · **OWC Laser - Tactical** · **Anti-Vehicle Mag**

WHY IT WORKS

The sourced physical profile remains lethal to the upper chest and arms at range; mobility parts offset its weight.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF It is a slow specialist. Anti-Vehicle Mag is about penetration behavior, not a generic S&D; damage promise.

DECISIVE NUMBER / CHECK

Sourced profile: 152 upper-chest/arm damage through 55 m and 128 beyond; legs are not a one-shot.

AGGRESSIVE DIRECTION Do not chase speed beyond the short barrel/stock/laser package.

CONSISTENCY DIRECTION Use Ghost over Toughness when the opposing team earns UAVs early.

Confidence: Moderate-high · build source checked 2026-07-29

B Rytec AMR

Sniper · Semi-auto heavy sniper

BEST S&D; USE

Hold penetrable long lanes and use the second shot only from safe cover.

THE FIVE

MIP Light Barrel (Short) · **OWC Skeleton Stock** · **OWC Laser - Tactical** · **Stippled Grip Tape** · **Full Ammo**

WHY IT WORKS

Chest damage is sourced at 120 through 40 m, and the semi-auto action gives a built-in follow-up.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF Handling is slow and the normal-ammo build is safer than explosive variants for serious S&D.;

DECISIVE NUMBER / CHECK

Sourced base profile through 40 m: 160 head, 120 chest, 104 waist.

AGGRESSIVE DIRECTION Explosive or thermite magazines are specialist choices, not the default.

CONSISTENCY DIRECTION Keep normal ammunition unless you have confirmed the current projectile behavior and ruleset.

Confidence: Moderate · build source checked 2026-07-29

B

SVD

Sniper · Fast semi-auto anchor

BEST S&D; USE

Punish repeated peeks and multi-enemy crosses from a stable head-glitch.

THE FIVE

RTC 660mm Heavy · 3x Tactical Scope A · OWC Skeleton Stock · OWC Laser - Tactical · 15 Round Extended Mag

WHY IT WORKS

Season 6 reduced the fire interval from 330 ms to 300 ms, making follow-ups and multi-kills materially faster.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF One-shot reliability depends on upper-torso placement and distance; do not treat it like a DL Q33.

DECISIVE NUMBER / CHECK

Live Season 6 fire interval: 300 ms = 200 RPM. The current build guide reports upper-chest one-shots to 30 m.

AGGRESSIVE DIRECTION The 3× optic is the practical aggressive lever; the rifle still prefers anchored positions.

CONSISTENCY DIRECTION Use Ghost instead of Toughness when stealth is more important than winning flinch fights.

Confidence: High on live interval; moderate on zones · build source checked 2026-07-29

B Arctic .50

Sniper · Stable semi-auto lane

BEST S&D; USE

Crouch or prone on a planned line, then use semi-auto recovery for a second target.

THE FIVE

6x Tactical Scope C · RTC Steady Stock · Bipod · MIP Stopping Power Reload · Stippled Grip Tape

WHY IT WORKS

Stopping Power restores stronger one-shot behavior; the stock, bipod and tape serve a deliberate anchor.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF The bipod is position-dependent and Stopping Power reduces fire-rate handling.

AGGRESSIVE DIRECTION For a true rush-sniper job, switch weapons instead of stripping the anchor identity.

CONSISTENCY DIRECTION Ghost can replace Toughness on maps where your lane has hard cover.

Confidence: Moderate · build source checked 2026-07-29

C

XPR-50

Sniper · Rapid follow-up sniper

BEST S&D; USE

Use disciplined two-shot tracking or head/upper-zone precision rather than gambling on body one-shots.

THE FIVE

RTC CQB · **YKM Ghost Stock** · **Operator Foregrip** · **OWC Stopping Power Reload** · **OWC Laser - Tactical**

WHY IT WORKS

Stopping Power improves damage behavior while the stock and laser recover speed and the foregrip stabilizes follow-ups.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF It lacks the dependable body one-shot outcome that defines the top S&D; snipers.

AGGRESSIVE DIRECTION Lean on the faster follow-up, not a single-shot fantasy.

CONSISTENCY DIRECTION Hold a narrower lane so the second shot lands before the target reaches cover.

Confidence: Moderate · build source checked 2026-07-29

C

M21 EBR

Sniper · Scoped DMR

BEST S&D; USE

Play it as a suppressed, stable two-tap marksman rifle with a sniper optic.

THE FIVE

OWC Light Suppressor · **6x Tactical Scope B** · **YKM Light Stock** · **Operator Foregrip** · **OWC Laser - Tactical**

WHY IT WORKS

Suppression and recoil control support repeated shots without advertising the firing lane.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF Weak one-shot performance means a true sniper can erase you between hits.

AGGRESSIVE DIRECTION Use a marksman rifle instead if you want a faster two-tap chassis.

CONSISTENCY DIRECTION Pre-aim and fire from hard cover; this is not a quickscope weapon.

Confidence: Moderate · build source checked 2026-07-29

SP

NA-45

Sniper · Anti-cover utility

BEST S&D; USE

Tag predictable cover, then land the catalyst round near the prime marker.

THE FIVE

MIP Light Flash Guard · **OWC Skeleton Stock** · **Wounding** · **OWC Laser - Tactical** · **Electromagnetic Ammo**

WHY IT WORKS

The unique Prime/Catalyst two-round sequence can punish enemies who remain behind the same cover.

SECONDARY L-CAR 9

PERKS Flak Jacket · Toughness · Dead Silence

BIGGEST TRADEOFF It demands a two-shot sequence, has low conventional sniper reliability, and may face competitive restrictions.

AGGRESSIVE DIRECTION Do not use this as a rush sniper.

CONSISTENCY DIRECTION Only equip it for a rehearsed anti-cover purpose; otherwise choose a conventional rifle.

Confidence: Moderate · build source checked 2026-07-29

S

Type 63

Marksman · High-skill marksman ceiling

BEST S&D; USE

Take a head-height mid-long lane and punish any repeat peek with a fast two-tap.

THE FIVE

GRU Silencer · **16.4" Titanium** · **KGB Pad** · **GRU Mag Clamp** · **Field Tape**

WHY IT WORKS

The base profile can two-shot the chest in roughly 170 ms, and one headshot reaches 100 HP at every sourced range.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF It demands accurate, rhythmic taps; missed shots erase the theoretical advantage.

DECISIVE NUMBER / CHECK

Sourced base: 353 RPM, 63 chest damage to 38 m and 54 beyond. Titanium is faster, but its exact live modifier is not asserted.

AGGRESSIVE DIRECTION Use Ghost instead of Toughness when flanking rather than challenging.

CONSISTENCY DIRECTION Keep Field Tape; flinch resistance is central to landing the second shot.

Confidence: Moderate-high · build source checked 2026-07-29

A

SKS

Marksman · Classic two-tap anchor

BEST S&D; USE

Hold a predictable cross and land two upper-body shots before exposing twice.

THE FIVE

Tactical Suppressor · **MIP Extended Light Barrel** · **MIP Stalker Stock** · **Disable** · **Granulated Grip Tape**

WHY IT WORKS

The current guide confirms two-tap upper-body behavior and builds for range, accuracy and up to 70% hit-flinch reduction.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF High ceiling, but recoil and manual fire cadence punish panic tapping.

DECISIVE NUMBER / CHECK

Current UI profile lists 60 damage; UI fire-rate 43 is not RPM.

AGGRESSIVE DIRECTION A no-stock/laser variant exists, but the stable S&D; build is more repeatable.

CONSISTENCY DIRECTION Do not give up flinch control unless you are already winning every first bullet.

Confidence: Moderate-high · build source checked 2026-07-29

A

SO-14

Marksman · Flexible semi-auto anchor

BEST S&D; USE

Use semi-auto for controlled mid-long picks; switch to the full-auto alternative only for a flex slot.

THE FIVE

Polarfire-S · **18" T300 Barrel** · **HMW-20 Optic** · **5GN Tactical Cheek Rest** · **Disable**

WHY IT WORKS

The semi-auto build combines suppression, sight clarity, recoil control and target disruption.

SECONDARY L-CAR 9

PERKS Skulker · Ghost · Dead Silence

BIGGEST TRADEOFF The announced Season 7 adjustment is not live and is intentionally excluded from this Season 6 guide.

AGGRESSIVE DIRECTION Full-auto alternative: Echoless-80 · 18″ T300 Barrel · 5GN Tactical Cheek Rest · Wild Fire · 50 Round Drums.

CONSISTENCY DIRECTION Semi-auto is the recommended S&D; default because it preserves ranged control.

Confidence: Moderate · build source checked 2026-07-29

B

MK2

Marksman · Close-mid one-shot marksman

BEST S&D; USE

Work fast mid-map head-glitches and keep every shot in the upper body.

THE FIVE

18.0" Sport Barrel · **MIP Sport Stock** · **OWC Laser - Tactical** · **.30 - 30 Ammo** · **Stippled Grip Tape**

WHY IT WORKS

The current guide confirms upper-body one-shot potential and stacks ADS/mobility around the .30-30 ammo.

SECONDARY Melee

PERKS Lightweight · Toughness · Dead Silence

BIGGEST TRADEOFF Range and one-shot forgiveness trail full snipers; lower-body hits can lose the round.

DECISIVE NUMBER / CHECK

Current UI profile lists 80 damage; its fire-rate number is not RPM.

AGGRESSIVE DIRECTION Melee fits the close-mid rotation role when your first-shot accuracy is reliable.

CONSISTENCY DIRECTION Use L-CAR 9 instead when hitmarkers are frequent.

Confidence: Moderate · build source checked 2026-07-29

B

SP-R 208

Marksman · Mobile scoped marksman

BEST S&D; USE

Treat it as a lightweight sniper for medium-long routes and disciplined first shots.

THE FIVE

Tactical Suppressor · **MIP Light** · **6X Tactical Scope 3** · **.338 5 Round Reload** · **Light Bolt**

WHY IT WORKS

The .338 conversion expands lethal coverage and the light bolt improves follow-up cadence.

SECONDARY L-CAR 9

PERKS Lightweight · Ghost · Dead Silence

BIGGEST TRADEOFF Only five rounds and bolt-action recovery make misses expensive.

AGGRESSIVE DIRECTION If you trust the base sight, replace the optic only after verifying the exact handling part in-game.

CONSISTENCY DIRECTION The L-CAR 9 is mandatory insurance for a five-round primary.

Confidence: Moderate · build source checked 2026-07-29

B

Kilo Bolt-Action

Marksman · Long-lane one-shot marksman

BEST S&D; USE

Hold a clean lane and let Stopping Power create the one-shot result.

THE FIVE

OWC Light Suppressor · **MIP Extended Light Barrel** · **3x Tactical Scope 3** · **OWC Stopping Power Reload** · **OWC Laser - Tactical**

WHY IT WORKS

Suppressor, range barrel, optic and Stopping Power make a purpose-built S&D; lane rifle.

SECONDARY L-CAR 9

PERKS Skulker · Toughness · Dead Silence

BIGGEST TRADEOFF Bolt recovery and laser visibility are exploitable; hide the beam before the peek.

AGGRESSIVE DIRECTION This exact build is already role-complete; use MK2 for a faster close-mid version.

CONSISTENCY DIRECTION Pre-aim rather than react-ADS because the long barrel and optic favor the planned angle.

Confidence: Moderate · build source checked 2026-07-29

C

M1 Garand

Marksman · Suppressed follow-up rifle

BEST S&D; USE

Anchor medium lanes and play for clean head-plus-upper-body sequences.

THE FIVE

MX Silencer · COOPER 21" Shrouded · CGC G2 Padded · FMJ · .30-06 16 Round Mags

WHY IT WORKS

The build combines suppression, stability, penetration and a 16-round magazine.

SECONDARY L-CAR 9

PERKS Skulker · Ghost · Dead Silence

BIGGEST TRADEOFF It cannot rely on a universal two-body-shot kill, so Type 63 or SKS has the stronger S&D; ceiling.

AGGRESSIVE DIRECTION Do not force a rush role; the rifle wins through sightline discipline.

CONSISTENCY DIRECTION Aim head-height so the first shot reduces the follow-up requirement.

Confidence: Moderate · build source checked 2026-07-29

Evidence rules

LIVE GATE

Season 6 “Take Your Heart” launched July 1, 2026 at 5 PM Pacific. The official live patch lists the SVD interval reduction; previewed Season 7 changes were kept out.

WHAT “VERIFIED” MEANS

Every weapon has a current-dated attachment source, one versioned JSON record, and an evidence pointer for every non-null number or attachment capability. Unsupported digits remain null.

OUTCOME MODEL

Where trustworthy raw damage was unavailable, the companion dataset records only the sourced 100 HP outcome (one-shot zone versus follow-up) and labels it as a model. It is not presented as physical damage.

LOCAL CHECK STILL MATTERS

Before ranked play, confirm every attachment name is visible on your current Global Gunsmith screen. Hotfixes and regional UI differences can invalidate community pages before search indexes update.

Final recommendations

IF YOU WANT ONE SNIPER

LW3-Tundra. It combines one-shot coverage, mobility and mixed-route value without requiring a narrow specialist plan.

IF YOU WANT THE SAFEST SNIPER

DL Q33. Its broad conventional one-shot behavior is easier to trust under ranked pressure than the narrow-zone speed specialists.

IF YOU WANT MAXIMUM CEILING

3-Line Rifle. Its current fast-build evidence is exceptional, but the best numeric claim remains provisional until reproduced on your device.

IF YOU WANT ONE MARKSMAN

Type 63. Its sourced 353 RPM and two-chest-shot profile create about a 170 ms base TTK. Choose **SKS** if you prefer a more established stable build.

THE PRACTICE ORDER

First master one opening lane with DL Q33 or LW3. Then add Type 63 for maps where a fast second bullet beats a missed bolt-action shot. Do not learn all 21 at once.

Guide complete: 14 sniper rifles + 7 marksman rifles · 21/21 weapon records.
